

Resident Creations

Second Life exists for the creativity of the Residents. Your dreams, ideas, and Projects come to life in this Virtual World. Linden Lab wants You to dream about something one moment and then breath life into it the next. Every tree, building, vehicle, animal, and object in Second Life is created by You - and other Residents. Even the strobe lights in the nightclubs and the cars (or spaceships!) in Your driveway.

You can modify the handling and power of Your very own motorcycle, and your friend can tweaks the capacity of the fuel tank. Another Resident might give the bike a wicked flame paint job.

All the creativity happens In-World and in Real-Time right before your very eyes. After the tricked out bike is complete - You can both race along the metaverse superhighway! (Just like Hiro in Snowcrash!)

When you are tired of driving - fit yourself with a pair of black raven wings and take flighth!

Join and once you are In-World you can:

- Watch as others create the things being Built Right Now

- Wander through virtual shops and browse the thousands of items for sale on community websites

- Experience a whole new dimension of movies as residents are pushing the envelope by Making Movies With Second Life

- Take time to educate yourself on the skills that let you Create Anything in Second Life
